Name:

(Last)
(First)
(Middle)

In addition to the information specified in the Applicant Handbook regarding each of your practice situations, this form needs to be completed. It will provide an estimate of the clinical cases you have seen and specific diagnostic, therapeutic, and surgical procedures you have personally performed. Your Curriculum Vitae will be unacceptable without this form.

In Section I, indicate how frequently you have seen specific conditions within the practices where you've worked. In Section II, indicate how frequently you use specified modalities of investigation and therapy. **Please estimate the frequencies as a cumulative total for all practice experiences.**

Section I: How frequently have you recognized and managed the following conditions during the lifetime of your practice experience?

	Never	Yearly	Quarterly	Monthly	Weekly	Daily
Behavioral disorders						
Chlamydiosis						
Egg binding/dystocia						
Egg peritonitis						
Fatty liver disease						
Fungal infections						
Gastrointestinal foreign body						
Gastrointestinal parasitism						
Gout						
Hypovitaminosis A						
Inhalent toxins						
Liver disease (infectious, nutritional, neoplastic)						
Malaria						
Pacheco's disease (other herpes viral infections)						
PBFD						
Knemidocoptes						
Polyoma disease						
Proventricular dilation syndrome						
Renal disease (infectious, nutritional, neoplastic)						
Sinusitis/air sacculitis/pneumonia						
Testicular/ovarian neoplasia						
Toxixosis (zinc, lead, copper)						
Tracheal mites						
Tuberculosis						
Yeast infections						

In the spaces below, please list any additional conditions that you feel are important aspects of your practice and indicate their frequency.

Section II: Over the lifetime of your practice experience, how frequently have you employed the following in the management of your cases?

	Never	Yearly	Quarterly	Monthly	Weekly	Daily
Acupuncture						
Air sac cannula placement						
Anesthesia – air sac delivery						
Anesthesia – inhalant						
Anesthesia – injectable						
Anesthesia – intubation						
Anesthesia – Mechanical Ventilator assisted						
Anesthesia – Capnograph monitoring						
Anesthesia – Blood pressure / body temperature monitoring						
Aspergillosis testing:						
- Antigen						
- Antibody						
- Galactomannan						
- Endoscopic sampling and cytology / culture						
Behavioral consultation						
Biosecurity assessment						
Blood transfusion						
Blood transfusion – oxyglobin administration						
CBC						
Chemistries (serum or plasma)						
Crop wash (therapeutic and diagnostic)						
CT scan						
Cytology (in house)						
-gram stain						
-Wright's stain						
-Special stains – other						
Cytology (outsourced)						
-Acid fast stain						
-Wright's stain						
-Special stains – other						
Electrophoresis						
Endoscopy						
-Cloacal						
-Coelmic						
-Gastrointestinal						
-Respiratory						
-Biopsy – hepatic						
-Biopsy – lung						
-Biopsy – renal						
-Biopsy – cutaneous						
Fluid therapy						
-Subcutaneous						
-I.V.						
-I.O.						
-Colloidal
