-Self-Report Job Experience Form-

ID#

Name:
(Last) (First) (Middle)

In addition to the information specified in the Applicant Handbook regarding each of your practice situations, this form needs to be completed. It will provide an estimate of the clinical cases you have seen and specific diagnostic, therapeutic, and surgical procedures you have personally performed. Your Curriculum Vitae will be unacceptable without this form.

In Section I, indicate how frequently you have seen specific conditions within the practices where you've worked. In Section II, indicate how frequently you use specified modalities of investigation and therapy. **Please estimate the frequencies as a cumulative total for all practice experiences.**

Section I: How frequently have you recognized and managed the following conditions during the lifetime of your practice experience?

	Never	Yearly	Quarterly	Monthly	Weekly	Daily
Ferrets						
Adrenal Disease						
Aleutian Disease						
Anaphylaxis						
Anemia						
Biliary cysts/adenocarcinoma						
Canine Distemper Virus Infection						
Cardiac Disease						
Chordoma						
Congenital defects/malformations						
Cystitis						
Dental Disease						
Dermatitis						
Diabetes mellitus						
Diarrhea						
Dirofilariasis						
Dystocia						
ECE (Epizootic catarrhal enteritis)						
Eosinophilic enteritis						
Estrogen toxicity						
Estrus-associated Aplastic Anemia						
External parasitism						
Foreign body ingestion						
Gastric ulcers						
Gastrointestinal obstruction or torsion						
Giardia						
<i>Helicobacter mustelae</i> infection						
Hydronephrosis						
Hypersplenism						
Ibuprofen toxicity						
Inflammatory bowel disease						
Influenza

Dental Disease									
Dental malocclusion									
Dermatophytosis									
Diarrhea									
Dystocia									
E. Cuniculi infections									
Ear mites									
Endometrial Hyperplasia									
Fibroma									
Fleas									
Gastrointestinal obstruction or torsion									
Gastrointestinal Stasis									
Hairball									
Head Tilt									
Heat stress/stroke									
Hepatic lipidosis									
Ileus									
Internal/External Parasitism									
Lead toxicity									
Lymphoma									
Mammary Mass									
Mastitis									
Meningoencephalitis									
Mucoid enteritis									
Myiasis									
Myxomatosis									
Neoplastic metastasis									
Nutritional Disease									
Ophthalmic Disease									
Osteoporosis									
Otitis									
Papillomatosis									
Pasteurellosis									
Pododermatitis									
Porphyrinuria/pigmented urine									
Pregnancy toxemia									
Prolapse (uterine, rectal, bladder, etc.)									
Proliferative enteritis									
Pseudopregnancy									
Pyometra and endometritis									
Rabbit syphilis/Treponema sp.									
Rabbit Viral Hemorrhagic Disease (RVHD)									
Rabies									
Renal failure									
Respiratory Disease									
Ringworm									
Rotavirus									
Salmonellosis									
Seizure									
Splay leg									
Spondylosis

Section II: Over the lifetime of your practice experience, how frequently have you employed the following in the management of your cases (Exotic Species Only)?

	Never	Yearly	Quarterly	Monthly	Weekly	Daily
Abscess management						
Anesthesia						
Antibiotic therapy						
Bandaging/external coaptation						
Blood transfusion						
CBC/chemistries/serology						
Colloid administration						
Computed Tomography						
Cryosurgery						
Cytology						
Dental trimming/extractions						
Ear cleaning						
Endoscopy						
Endotracheal intubation						
Enema						
Enteral medication/treatment						
Esophagostomy tube placement						
External parasite exam (skin-scrape, tape prep, etc.)						
Fluid therapy (IV, IO, SQ)						
Force feeding						
Gavage tube						
Hematology/cytology						
Histopathology						
Laser surgery						
Lavage/wound care						
Magnetic Resonance Imaging						
Microbiology (culture/sensitivity)						
Nasolacrimal duct flush						
Nebulization						
Necropsy						
Nuclear scintigraphy						
Nutritional consultation						
Nutritional support						
Orchiectomy/ovariohysterectomy						
Oxygen therapy						
Pain Management						
Parasite Fecal Exam						
Parenteral medication/treatment						
Physical examination						
Radiology (survey and contrast						
Radiosurgery						
Stabilization of fractures						
Surgery (adrenal, pancreas, exploratory, biopsy)						
Ultrasonography						
Urethral catheterization
